Trouble-shooting:

错误解决：

Hive is developed without Apple Developer's membership (because of economic restrictions), which means the software is not certified officially.
Hive在开发过程中没有使用苹果开发者证书（经济原因）。所以第一次运行会发生类似"未认证开发者"的警告。

But Hive is open-source software, and it is under everyone's supervision. The code is available on GitHub(https://github.com/ultrasilicon/hive). The developer promise that no spy function or any other action related to your Privacy will appear in Hive.
但是**Hive**是开放源码软件，所有人都可以监督它的安全性。源代码在**GitHub**上（**https://github.com/ultrasilicon/hive**）。开发者在此承诺**Hive**不会有任何间谍功能以及涉及您隐私的任何动作。
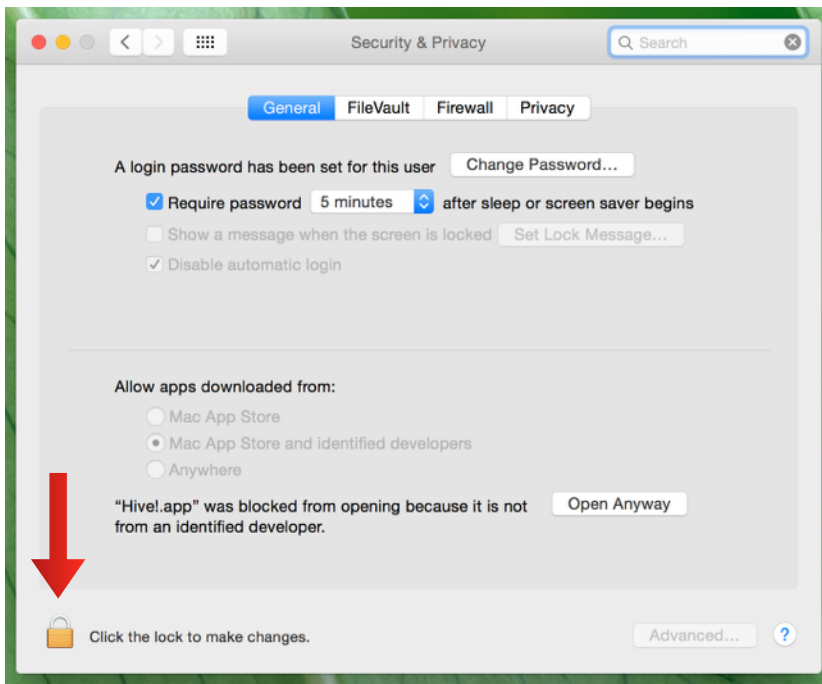

It's easy to solve the problem in two steps:
解决办法很简单，两步完成：

1. When following warning pops up:
会跳出如下提示（确认就好了）：

2. Go to System Preferences > Security & Privacy and then Unlock:
进入 系统偏好设置 > 安全与隐私 然后解锁：

3. Select "Allow apps downloaded from" > "Anywhere" :
选择"允许应用来源" > "任何来源" 然后顶部会跳出确认框， 确认就好了。
